---

### Summary

Frontend Software Engineer with 5+ years of experience building scalable web applications using React, JavaScript, and modern web tooling. Passionate about translating complex problems into intuitive user experiences. Thrive in agile teams where code quality, maintainability, and user value are core priorities.

---

### Work Experience

#### PROFESSIONAL DEVELOPMENT

Australia

*May 2025 - Present*

- Continuously upskilling through courses and personal projects, focusing on modern front-end tech (TypeScript, Tailwind, React Server Components, Next.js, AWS, GitHub Actions) and AI-driven development tools.

#### SOFTWARE ENGINEER

Telstra - Australia

*August 2022 - July 2024*

- Created reusable and performant components in React, Redux, and HTML/CSS for scalable enterprise web applications
- Led feature development from design to deployment
- Implemented tests with Jest and Cypress
- Gained experience with AWS (Lambda, S3, CloudWatch and DynamoDB)
- Configured CI/CD pipelines in Bamboo
- Managed and executed production releases
- Collaborated with Backend REST API team
- Managed Git version control and conducted MR reviews (GitLab)
- Mentored one junior developer in React best practices
- Contributed to internal documentation to support long-term maintainability
- Monitored code quality with SonarQube

#### FRONTEND WEB DEVELOPER

EyeOnIt - Australia

*March 2021 - August 2022*

- Created reusable and performant components in React, Redux and HTML/CSS
- Created unit and e2e tests with libraries such as Jest, and Cypress
- Contributed to a greenfield project built with Next.js with TypeScript, and Tailwind CSS
- Worked in an agile environment using JIRA
- Managed Git version control and conducted PR reviews (GitHub)
- Used tools such as Webpack and ESLint for bundling and linting

#### JUNIOR FULL STACK DEVELOPER

Technisys - Argentina

*January 2018 - June 2019*

- Developed web interfaces using HTML5/CSS/ES6 with jQuery
- Engineered backend services using Java & Spring Boot
- Worked in an agile environment using JIRA
- Maintained code versions using Git

---

## Educational History

### **BACHELOR OF SOFTWARE ENGINEERING**

UNICEN University, ARG  
2015 - 2019

### **UNIVERSITY ANALYST PROGRAMMER**

UNICEN University, ARG  
2011 - 2015

---

## Relevant Skills

- Proficiency in JavaScript, React, Redux
- Agile methodologies
- Testing and debugging techniques
- Adaptability and continuous learning

---

## Career Breaks

### **TRAVEL & PERSONAL DEVELOPMENT**

*Southeast Asia & Europe*  
*July 2024 - May 2025*

- Traveled through Southeast Asia and Europe (Indonesia, Thailand, Vietnam, Denmark, Netherlands, Belgium, Spain, Portugal, Italy, France, Switzerland, Germany, Hungary, and England)
- Focused on self-growth, cultural exploration, and gaining global perspectives

### **WORKING HOLIDAY IN AUSTRALIA**

*Australia*  
*August 2019 - April 2021*

- Moved to Australia to improve my English and explore a new culture
- Worked in different roles within the hospitality and construction industries, across the Sunshine Coast and the Australian outback
